# Screening Task
# Simple coding challenge

Task Duration: 90 mins

This is the first step in the hiring process to join Enozom team. It's required to follow the steps to get the required result and submit the result via the API.

- The following flow chart describes how you are going to use the API to:
  get the API key-> get the problem text -> prepare the result and submit it.

- API documentation: https://mytask.enozom.com/BackEnd/swagger/index.html

- Using API accessing tools like **Postman is not allowed**, you have to write a code and submit the result.

- You should pass your API key in the header like this x-api-key:
  ffaSp7Q161VUGfir84xxnYmgkkWYrsxk15v4l8lE6yz8ullVpoW

**Instructions**

- It's important to make this task yourself, don't ask anyone for assistance or support.
- Before you submit your result (using the API), make sure to run the code on the provided test case to make sure that your answer is correct

  Test case:

  Text = ABCDEFGHIJKLMNO

  Result = BCDFHLN
- Make sure that your code is not accessing the API inside a loop, because this will block your API Key, and you will not be able to complete the task
- The only way to submit the result is the API call, we will not check any results in the email
- You can use postman to verify the APIs but it will not help you to submit the result.
- You are allowed to use any tool, library, ready-made code, Chat GPT, or any AI tools to help you in the task
